

## **Press Release – 12<sup>th</sup> May 2008**

### **ES Technology Limited is top of the class for lasers**

As an authorised distributor for Universal Laser, [ES Technology Ltd](#) has for some time been recognised as the first choice supplier for the **VersaLaser ( VLS )** and **Professional Laser Series ( PLS )** laser systems to a diverse range of UK customers.

The latest addition to the extensive list of ES Technology customers however, is not an industrial or manufacturing company but an educational establishment.

#### **Student models designed and manufactured more quickly**

William Parker School in Daventry have recently purchased a Universal Laser **VL200** system from ES Technology Limited, to enhance the manufacturing facilities and learning experience of students participating in the Design Technology component of the school curriculum.

Using the **VL200** laser system (Fig.1), the students can now perform high quality cutting and engraving operations on the diverse range of materials which are used to produce student models. The materials which can be processed by the system include:-

- Acrylic sheet
- Paper and card
- Rubber
- Glass
- Composite plastics
- Plastic and aluminium labels
- Metal components

(Fig.1 – ULS **VL200** – used by students at William Parker School - Daventry)

The ULS CO<sup>2</sup> laser is a highly flexible system and is particularly good for cutting fine decorative shapes in acrylic materials. The system can be quickly set up from a PC and with a work area of 476mm x 368mm x 102mm a wide range of student projects can be accommodated within the system.

Bob Groom, Technical Instructor at William Parker School said "I am very impressed with the laser cutter and the school uses it on a daily basis". The **VL200** system provides the students with an insight into the world of CAD / CAM manufacturing.

As part of their ongoing process of product development, Universal Laser has now released the **VersaLaser VLS2.30** which has a similar working size to the VL200 but with the following additional features:

- Non-scratch safety glass lid
- Materials-based print driver
- Job Time Estimator
- Motion System Protection

ES Technology Limited supplies the full range of **Universal Laser Systems** products within the UK and Ireland. The company also provides **sub-contract laser cutting, engraving and marking services, after sales service and parts** plus the **design and manufacture of laser marking systems**.
